Projects

Solana SPL Token Launchpad [Live Site](#) [GitHub](#)

April 2026 – May 2026

- **Tools:** React.js, Solana Wallet Adapter, SPL Token Program, Metaplex, Tailwind CSS, Vercel
- Built a production-ready Solana launchpad enabling users to create and deploy SPL tokens on mainnet and devnet with wallet integration in under a minute.
- Engineered 5+ deployment modules including token creation, Metaplex metadata integration, dark mode UI, and multi-network support.

OmniWallet - Digital and Crypto Wallet Platform [Live Site](#) [GitHub](#)

April 2026 – May 2026

- **Tools:** React.js, TypeScript, Tailwind CSS, Vercel
- Developed a responsive digital wallet platform supporting secure crypto wallet generation and wallet management workflows.
- Built 10+ reusable React components with TypeScript-based state management and fully responsive layouts across devices.
- Designed modern fintech-inspired UI with dark mode support, responsive layouts, and performance-focused user experience.

Smile Guru Clinic Management System [Live Site](#) [GitHub](#)

Jan 2026 – Feb 2026

- **Tools:** Next.js 14, Supabase (Auth + PostgreSQL), Tailwind CSS, TypeScript, Vercel
- Shipped a clinic management system in 2 months supporting up to 50,000 monthly users with secure admin dashboard.
- Engineered 5+ modules including patient records, appointment calendar, treatment timeline, and wallet system with CSV export.
- Implemented 2 real-time features (contact, booking) with live admin notifications, improving response and patient handling workflow.

Experience

Hunani Infotech - Intern (Web CMS and E-Commerce Customization)

Jan 2026 – Mar 2026

- Customized Shopify websites with UI, theme, and responsiveness improvements based on client requirements.
- Implemented plugin integrations, product configurations, and content updates for client stores.

Certifications & Publications

- **Research Publication (IJIRT 2026):** Bridging Learning, Gamification, and Digital Work - A review on integrating gamified learning with freelance ecosystems -> [View Paper](#)
- Quick Heal Certified Vulnerability Assessment and Penetration Testing Analyst
- NPTEL Theory of Computation
- Meta's Version Control
