Projects

Smile Guru Clinic Management System [Live Site](#) [GitHub](#)

Jan 2026 – Feb 2026

- **Tools:** Next.js 14, Supabase (Auth + PostgreSQL), Tailwind CSS, TypeScript, Vercel
- Shipped a clinic management system in 2 months supporting up to 50,000 monthly users with secure admin dashboard.
- Engineered 5+ modules including patient records, appointment calendar, treatment timeline, and wallet system with CSV export.
- Implemented 2 real-time features (contact, booking) with live admin notifications, improving response and patient handling workflow.

[Sangini Advanced Women's Care - E-Commerce and Appointment Web App](#)
([Link to Project](#))

Nov 2025 – Jan 2026

- **Tools Used:** Shopify, HTML, CSS, JavaScript
- Built and customized a client-facing Shopify e-commerce website for a hospital with UI enhancements and appointment booking workflow.
- Designed responsive layouts, product/service pages, and interactive UI aligned with client branding.
- Delivered end-to-end solution independently, including setup, customization, and client revisions.

[Merituno - Gamified Learning and Freelancing Platform](#) ([Github Link](#))

Jan 2025 – Aug 2025

- **Tools:** React.js, Node.js, Firebase (Auth, Firestore)
- Built a full-stack gamified platform with 3 roles (User, Employer, Admin) supporting 3000 users/day.
- Implemented XP, star-based progression, job/freelance system, and real-time chat.
- Developed wallet, admin panel, and scalable backend for user management and transactions.

Experience

Hunani Infotech - Intern (Web CMS and E-Commerce Customization)

Jan 2026 – Mar 2026

- Customized Shopify websites with UI, theme, and responsiveness improvements based on client requirements.
- Implemented plugin integrations, product configurations, and content updates for client stores.
